

Aaron Jacob Sunil

Pathanamthitta, Kerala — 📞 +91 9744185614 — ✉ aaronjacobsunil@gmail.com

Professional Summary

Analytical Information Technology undergraduate passionate about building intelligent, data-driven systems. Focused on bridging Generative AI, automation, and emerging technologies to develop efficient, user-centric digital solutions. Curious learner with a strong problem-solving mindset and adaptability to new domains.

Academics

APJ Abdul Kalam Technological University (KTU)
B.Tech in Information Technology

Kottayam, India
2022 – 2026

CBSE Board
Higher Secondary Education

Kuwait
2022

Internship

Full Stack Developer Intern — Sreenarayanaguru Open University
Kollam, Kerala

May 2025 – Jun 2025

Built a bilingual academic chatbot improving accessibility for 500+ users through intelligent voice and text interaction.

Reduced data latency by 20% via optimized backend workflows and query caching strategies.

Collaborated with cross-functional teams to integrate secure authentication modules.

Projects

Lumira – Interactive AI Assistant for Exhibitions
ChromaDB, FastAPI, React

Nov 2025 – Present

Developed an AI-driven exhibition assistant handling 1,200+ product queries with 92% semantic match accuracy.

Implemented Retrieval-Augmented Generation (RAG) for contextual responses and improved query speed by 35%.

Enhanced engagement by 40% through adaptive UX and real-time analytics visualization.

Nutriswap – Intelligent Food Alternative Finder
React, FastAPI, PostgreSQL, Tailwind CSS

Dec 2025 – Present

Built a full-stack health application enabling users to find 100+ native and continental food alternatives based on nutritional value.

Engineered a smart recommendation engine filtering options by health goals (e.g., Diabetic, Heart-Healthy) and allergens.

Optimized database queries using SQLAlchemy, reducing search latency by 40% for a seamless user experience.

InfoBot – AI Chat Assistant for Campus Management
Python, React, FastAPI, MySQL

Feb 2025 – Apr 2025

Engineered an automated timetable generation module that reduced administrative creation time from 2 weeks to 2 minutes.

Automated 1,000+ student queries regarding schedules and grades, improving campus support efficiency by 40%.

Designed a robust REST API using FastAPI to handle high-concurrency requests with minimal latency.

TaskIT – Smart Task Management App
Node.js, MongoDB, HTML, CSS, JS

Oct 2024 – Nov 2024

Developed an adaptive task management system that organizes workflows, improving user productivity by 25%.

Implemented intelligent scheduling algorithms to dynamically prioritize tasks based on deadlines and user habits.

Created a modular backend architecture using Node.js and MongoDB to support real-time data synchronization.

Technical Expertise

Languages: Python, JavaScript, SQL, HTML, CSS

Frameworks: FastAPI, React, Django, Node.js

Databases: MySQL, MongoDB, ChromaDB, PostgreSQL

Core Areas: Generative AI, Cloud Systems, Data Visualization

Certifications

DeepLearning.AI: **ChatGPT Prompt Engineering**.

NPTEL: **Fundamentals of Cloud Computing** (75%).
